Dimes for Down syndrome

International Mosaic Down Syndrome Association

Uniting Unique People in a Unique World

March 21st is World Down syndrome day! To celebrate The International Mosaic Down Syndrome Association has their annual "Genes Day". The date is significant 3/21 because Down syndrome is the triplication of the 21st chromosome. Our son Treston has a very rare type of Ds called mosaic Down syndrome. This disorder is so rare in fact that there is not yet enough research. The IMDSA is fulfilling that need for research and we need your help. We are asking if you or your child could help us by donating your dimes to the IMDSA. We also want to promote awareness of those with Ds and mDs through the Genes Day celebration. As a thank you we will have a pizza party at WCDC on March 21st GENES DAY! Come on and let's celebrate Trey's designer Genes!
